■ **International Workshop "On the future of glycoscience?"**

Glyco@Alps is organizing a workshop during the Global Challenges Science Week on June, 5 and 6. Carbohydrates are biomolecules with a fascinating structural diversity and complexity. The workshop will explore their future application in the domains of biopharmaceuticals, medical diagnostics, personalized medicine, materials, environmental sustainability and innovative bio-industry. We will have lectures notably by Silvia Vignolini (University of Cambridge, UK), Antonio Molinaro (University of Napoli Federico II, Italy), Christoph Rademacher (Max Planck Institute of Colloids and Interfaces, Potsdam, Germany), Rita Gerardy-Schahn (Medical University of Hannover, Germany), Rodney Townsend (GnosTek, UK), Bjorn Christensen (NTNU, Trondheim, Norway) and Frédérique Lisacek (Swiss Institute of Bioinformatics, Geneva, Switzerland). The program of this international event is now available. [More information](#)

■ May 27, 2019 – **Glyco@Seminar with Paul DeAngelis**

Paul DeAngelis from University of Oklahoma Health Sciences Center (USA) will give a talk about "Glycosaminoglycan Engineering: Designing Natural Sugar-based Therapeutics & Drug Delivery Systems" at Cermav at 11:00 am. [More information](#)

■ From June 3 to 6, 2019 - **Global Challenges Science Week**

Addressing global challenges urges a strong worldwide collaboration of scientists from different fields. To this aim, Univ. Grenoble Alps' GSCW brings together scientists, experts and stakeholders from all around the world to share the latest research results, carrying out transdisciplinary conversations, and providing an opportunity for setting-up new international collaborations to deal with the following 21st century issues: Sustainable planet and society; Health, well-being and technology; Digital world; Understanding and fostering innovation.
