Newsletter #26 – September 2021

Edito

With September, we are reflecting on the directions we will give to these multidisciplinary collaborations that have been structured around the Cross Disciplinary Program Glyco@Alps of the University Grenoble Alpes for the last five years. The University is going to open a call for projects entitled CDTools for a start in 2022, in which we plan to get involved. We will soon invite you to a General Assembly to discuss this point. And the Glyco@Alps website keeps relaying information about our research community. Do not forget to send us the information about your doctoral students' defenses, we will relay them. See you soon!

New & Emerging Technologies: Biotech meets Medicine
(virtual event)**

The New and Emerging Technologies Conference 2021 is an interdisciplinary networking event showcasing current projects as well as trends and innovative technologies in the fields of biotechnology and medicine. Now in its 3rd edition, this conference is once again a forum for researchers, medical professionals, and industry representatives to discuss current advances, future challenges, and different approaches to solutions, identify synergies, and find new opportunities for collaboration on current issues and topics in health research. Wednesday 22 September, the day will be devoted to advances in Glycobiotechnology. Among other networks, Glyco@Alps will be presented by Anne Imberty, followed by some recent results on *Neoelectins and superlectins – new tools for synthetic glycobiology* at 10.15 am.
